

Company Description

National Applied Research Laboratories (NARLabs) is a Taiwan government funded and non-profit organization. There are four main missions for NARLabs: establishing research and development platforms, supporting academic research, promoting frontier science and technology and fostering high-tech manpower.

For the innovation ecosystem, NARLabs will serve as a platform to align upstream and downstream segments along the R&D continuum, which will be one of the crucial aspects in Taiwan's S&T transformation process. In this connection, the pressing task for the NARLabs is to augment the "translation" function and maximize its roles in elected projects of various fields with potentials for success. For example, the establishment of platforms of next generation smart electronics and experimental biological materials is to elevate the development potentials in Taiwan's
